Denison University
Granville, Ohio 43023

Dear Harper,

Congratulations! I am very pleased to tell you that you have been selected to be an **Anderson Science Scholar for 2019-2020**. The Anderson Science Scholarship supplements any other scholarships you hold to result **in a full tuition award for 2019-2020**. The Anderson Science Scholarship will be renewed for your senior year upon successful completion of your junior year of studies.

One of the major privileges accompanying the honor of receiving an Anderson Scholarship for Excellence in Science is that in the summer following your junior year (2020) one of the Anderson Summer Research Assistantships will be reserved for you, should you decide to apply for an assistantship next January. Currently the Anderson Summer Research Assistantship pays \$4000 for ten weeks of research under the guidance of a member of the Denison science faculty.

The Review Committee likes to use this letter as an opportunity to provide you with some feedback about your interview. The committee was very impressed with your academic credentials and the breadth of activities in which you participate, both in and out of science. In your interview you did a nice job explaining your research experiences and interests, as well as your interest in science. Your strong interview performance, coupled with your ability to clearly articulate your future educational and career goals, also contributed to your success in receiving the Anderson Scholarship for Excellence in Science.

Again, my sincere congratulations and best wishes.

Sincerely,

A handwritten signature in cursive script that reads "Jessica E. Rettig".

Jessica E. Rettig
Associate Professor of Biology
Director, Anderson Endowment
